Pirates

“Ooh arr, Matey!” Everybody knows that pirates were the villains of the sea who roamed the ocean waves during the 17th and 18th centuries. But were they actually the merciless criminals that we’ve been led to believe?

In fact, many pirates were actually privateers. They were basically pirates with a license to commit crimes granted by governments. Francis Drake is one of the most famous admirals in British history and was a personal favourite of Queen Elizabeth I. Much of his time at sea was spent attacking and looting Spanish ships and pillaging and plundering their settlements around the world. Spain and many other countries considered him a pirate in the same way as we would Blackbeard and Captain Kidd, but to the British, he was a hero.

Pirates also had a strong code of honour, at least amongst themselves. They all had a vote in the running of the ship, rarely stole from each other, never gambled and were in bed early every night.
